Coronavirus Social Story
Coronavirus is an illness that makes you feel unwell.

You can get a sore throat, a fever and a cough.
We can do some things to **help keep us safe** from coronavirus and stop us from getting sick.
You can wash your hands.
With soap...
or with hand sanitiser.
Wash the **top** of your hands.

The **bottom** of your hands.

And **in between** your fingers.
Cough and sneeze into your elbow or a clean tissue.
Washing our hands, and sneezing and coughing into our elbow or a tissue will help keep us healthy and happy.
Thank you to
Jenni Radloff, C&K Education Practice,
Wellbeing and Inclusion Advisor, for this initiative to support our children during the coronavirus pandemic.
