

C&K Salisbury Kindergarten

Wants the best for your child.

C&K Salisbury has a team of qualified and dedicated early childhood Educators who foster the unique capabilities of each child. Our aim is to provide a caring, safe and educational environment which promotes children's development and fosters a love of learning.

Alongside other children and adults your child will:

- Learn how to interact with other children and develop relationships
- Explore and express their creativity
- Connect with natural environments
- Build confidence and find their unique identity
- Connect with their world through play and other experiences
- Learn to be an effective communicator and enthusiastic learner who contribute to a collaborative curriculum.

C&K centres offer a unique curriculum known as *"Building waterfalls"*. This internationally renowned framework promotes the importance of the early years in laying the foundations for success in life and learning.

An open door policy at our service promotes children, families and educators to be a part of our Kindergarten Community. Our program is designed to promote the healthy development of your child and embraces learning as a collaborative endeavour and a lifelong pursuit.

We focus on children as competent and capable individuals, recognising and valuing the importance of play as a catalyst for children's learning; enabling children to own their decisions and choices and fully formulate and develop their own ideas. This is what makes C&K centres unique!
