

A Special Message for Parents and Guardians - Novel Coronavirus 28/1/2020

Dear Families,

As you may be aware, Australian health authorities are currently responding to the emergence in Australia of the Coronavirus that has emanated from China.

Attached is information from Queensland Health advising that if children become sick (e.g. fever, flu-like symptoms, sore throat, headaches, breathing difficulties) after recently having links to Wuhan or the Province of Hubei within China, or having contact with someone who is a confirmed case, they should present immediately to a doctor and not attend a kindergarten or childcare centre while unwell.

The safety of children is C&K's top priority and as such we follow the advice of public health authorities. We ask you to be especially aware of this current situation in the interest of public health.

For more information, please visit <https://www.healthdirect.gov.au/coronavirus>.

Thank you for your support in relation to this matter.

Warm regards,

C&K Central
